DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the present drawings are illegible and insufficient for publication. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

2. This application is in condition for allowance except for the following formal matters:

Claims 1, 2, and 5 are objected to because the abbreviations of "PDB" and "*T. matsutake*," should be replaced with the full term. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art made of records fails to disclose a method for producing a *Tricholoma matsutake*-infected young pine tree where the *T. matsutake* is pulverized into a PBD medium into a culture container having the particular claimed ratio of dry weight to sterile water, then placing a mixture of perlite and sphagnum moss into the container, then aliquotting a k-liquid medium containing the compounds as claimed in the particular amount, into the mixed soil, and finally adding a germinated pine seed up to 3cm in length to the same container, covering the container and coculturing the seedling and mycelia for 24 hrs at the claimed environmental conditions.
